

## Quilt-Pro 6

### Using Magic Mirror to Create a Block

The Magic Mirror Tools lets you take blocks and combine them together to make new blocks. Use the Magic Mirror when you want to create new blocks without drawing any patches. The Magic Mirror takes a single block and repeats it in "mini" layouts of 4, 9 12 etc. blocks

Save and close all open document windows that are in use. Then press the New File button on the ribbon bar.

#### To Open the Magic Mirror

Click on the **Effects** Menu and Select **Magic Mirror**. The Magic Mirror box opens.

**Tip:** If you have a block already open, that block will display in the Magic Mirror.

- 1-Block Library - The same major categories as in the block library
- 2-View Basics - View the blocks in the Basics folder. This is the default folder.
- 3-Block Viewer - View more blocks using the scroll bar to the right
- 4-Search Bar - Use the search bar to find other blocks to use.
- 5-Affect all Sections - Select this option if you want all sections to be affected by options you use. We will use it unselected.
- 6-MM Toolbar- See below for more discussion on the tool bar
- 7-Block Size - The size of the new block. Use arrows to increase or decrease size.
- 8-Section Counts - Use arrows to increase or decrease the number of sections.
- 9-New Document - Place finished block in a new Document.
- 10-Star Over - Clears all sections.

# Quilt-Pro 6 - Using Magic Mirror to Create a Block

1. Move to the Section Counts area and set to 3 Across and Down.
2. Set **Block Width** and **Height** to **12"**.
3. Select the **2 Triangles** block and then click the 4 center sections as shown in the image.

Now select one of the Rotate tools and click on each of the x'd blocks until they are in the same position they are in the image.

# Quilt-Pro 6 - Using Magic Mirror to Create a Block

Scroll down the block list to find the **Butterfly** block and add to the 4 corners of the sections.

Use the Rotate or Flip tools to adjust the position of the corner blocks.

## Quilt-Pro 6 - Using Magic Mirror to Create a Block

In the Search Box, type in **Friendship Star** and press the **Search** button.

When the block appears on screen, add it to the center section.

Except for coloring, the block is complete. Press the **New Document** button and the block will appear on your work area.

Now color as desired.

Use **File** menu, **Save As** and give your new block a name.
